- Python Programming and Automation
- Data Collection and Processing Solutions
- Software Development Support
- Technical Training and Internship Programs
- Prinpio Tech focuses on providing industry-relevant so

Working domain Cloud Computing (AWS)

- During the internship, my assigned working domain is **Cloud Computing using Amazon Web Services (AWS)**, supported by **Python Programming**.

This domain focuses on understanding cloud infrastructure, basic AWS services, and applying Python programming concepts to perform **data collection and processing tasks**.

- The work involves writing Python programs, using logical conditions and functions, and preparing systems that can be integrated with cloud-based environments.

LiteratureReview and Problem Statement

- **Literature Review**

- Studied AWS official documentation and tutorials
- Referred Python programming learning resources
- Reviewed basic data collection techniques

- **Problem Statement**

- Manual data collection is time-consuming and prone to errors.
There is a need for an automated and efficient data collection system using Python, which can be integrated with AWS cloud services.

Advantages of Proposed System/Work

- Reduces manual effort and errors
- Improves data accuracy and reliability
- Saves time through automation
- Easy to maintain and modify
- Scalable using AWS cloud services
- Enhances technical and practical learning
